

## Deviation Report

Site: API Manufacturing Unit

Date of Occurrence: 25 September 2026

Source: Production

Product: Ibuprofen API

Batch Number: IBU-260925-02

During routine manufacturing, the pressure reading on Reactor-03 was observed at 4.8 bar. The approved operating range is 3.0 to 4.0 bar.

The abnormal pressure was detected during in-process monitoring. The operator stopped the operation and informed the production supervisor.

The batch was placed on hold. Quality Assurance and Engineering were notified for investigation.
